EVERCORE®

EverCore®

All painted finishes are applied on our super smooth, compressed wood fiber door and drawer front material that's designed to resist the effects of temperature and humidity better than milled wood.*

*Painted finishes are applied to Maple for Derian and Sullivan door styles.

Beautiful performance. That's the Merillat Way™.

Superb Finish: Every cabinet begins with a furniture-quality, 14-step finishing process designed to protect and enhance its beauty for years to come. Each finish is oven-cured and sealed with a two-layer topcoat, creating a smooth, lustrous surface that resists wear, moisture, and time.

Quality Construction: Strength you can see and feel. Our industrial-grade $\frac{1}{2}$ " end panels and I-beam construction ensure every cabinet remains square, sturdy, and reliable. Full-depth, $\frac{3}{4}$ " adjustable shelves provide added integrity and effortless adaptability for your storage needs.

Drawer Construction: Engineered for everyday excellence. Solid wood dovetail drawer boxes pair with full-extension, soft-close undermount glides for unmatched durability, stability, and ease of use.

Soft-Closing Drawers & Doors: Refined to the touch. Integrated soft-close hinges and glides allow doors and drawers to close gently and quietly, reducing noise, eliminating slams, and ensuring lasting performance with every motion.

Merillat products are ANSI A161.1 certified, the industry standard for quality in cabinet manufacturing. In addition, we are certified for eco-consciousness by the Safe and Sustainable Cabinetry (SASC) program.

*Standard construction features listed.
